

## **Tree report T1 at Beech Cottage Hackforth, DL8 1PA**

Report compiled by T. Duffield (ISA cert Arb)

This report is compiled from visual assessment only.

Species:	Sycamore
Age:	Young
Condition:	Good
Height:	12m
Crown Spread:	12m
Dia at chest height:	210 cm

Sycamore T1 is a single stem tree forked at 5m. The tree is in good overall health, is young and vigorous. Crown form is well structured with no obvious defects visible (see photo 1).

T1 is situated to the Northern edge of the grounds of Beech Cottage, Hackforth, 1.5m from Bowbridge Beck (see photo 2).

Removal of this tree should be considered in order to safeguard the cobbled retaining wall of the beck. While this tree is relatively young the future growth increments will cause inevitable failure of the retaining wall (see photo 3).
